

03. TECHNOLOGY IN CAREERS

M1U1P3

TECHNOLOGY IN CAREERS

- Every job has to use different kind of technology and different types of tools
- For example
 - Farmer uses a rake
 - Drivers use cars or trucks
 - Office workers use phones and copy machines...

TECHNOLOGY IN CAREER

- In the future people will create different types of technology that will be used either as industry or as service
- Technology as industry means we use technology for creating products
- Technology as a service means we are providing some service by using technology (online shopping, GPS, smart healthcare...)

TECHNOLOGY IN CAREER

- The improvement of technology will change peoples lives to better
- Example:
 - Medicine
 - Agriculture
 - Robotics
 - AI

TECHNOLOGY IN AGRICULTURE

- In the past we have used sickle for cutting rice and people had to collect it manually
- Today with the advancement of technology we are using machines to do that work (combine harvester)

TECHNOLOGY IN CLOTHES MAKING

- Before we have used hand powered weaving machines, which took a lot of time to make clothes
- Today we use automated machines that can make clothes very fast

TECHNOLOGY IN THE OFFICE

- Before work in the office was mostly just paperwork
- Today, computers have replaced all the paperwork

WHAT KIND OF TOOLS DO WE USE HERE?

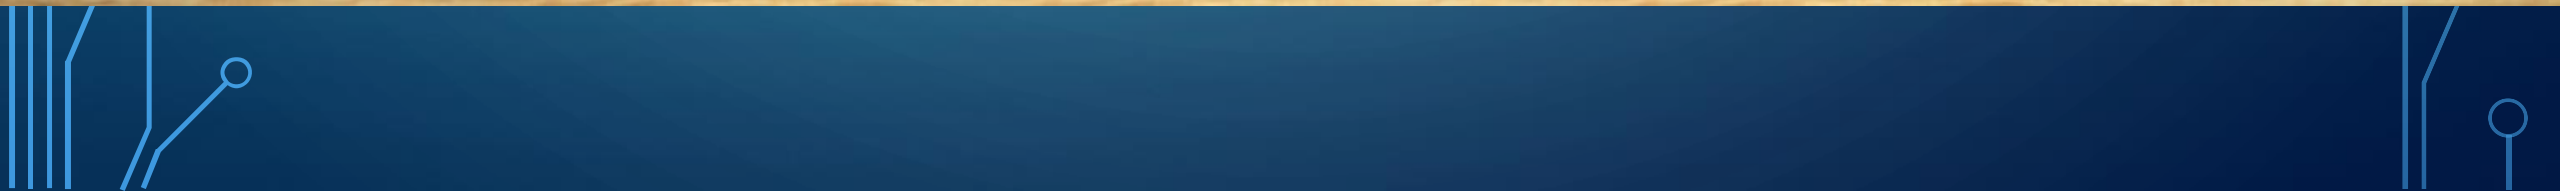

HOW DID THEY MAKE SMOOTHIES BEFORE MODERN TECHNOLOGY?

HOW DO YOU THINK THEY WILL MAKE SMOOTHIES IN THE FUTURE?

ANY QUESTIONS?

HOMEWORK

THE END
