

W2. Advantage of Technology

1. What is solid waste?

2. How many waste types do we have? Write their names

3. Connect the name of the waste type with content that belongs to that type of trash.

Organic waste		Paper, plastic bottles, cans
Recyclable waste		Food leftovers, leaves, branches
Dangerous waste		Plastic bags, plastic wrappers, foam boxes
General waste		Batteries, lightbulbs, chemicals

4. Circle the correct answer.

We take a thing that we have already used and use it again for something else.

- a) reduce b) reuse c) recycle

We try to create less waste by refusing or avoiding items or packages that can create a lot of waste.

- a) reduce b) reuse c) recycle

A process where we take something and turn it back into original material and create a new thing from it.

- a) reduce b) reuse c) recycle
