

W4. Technology in environment management

1. What 3 new technologies that can fix the environment did we talk about in class?

2. How does the water treatment work?

3. How does the cyclone machine work? Fill in the missing information.

4. How many types of solid waste do we have? Name them.

5. Connect the name of the waste type with content that belongs in that type of trash.

Organic waste		Paper, plastic bottles, cans
Recyclable waste		Food leftovers, leaves, branches
Dangerous waste		Plastic bags, plastic wrappers, foam boxes
General waste		Batteries, lightbulbs, chemicals
