

## W1. CSS and Syntax

1. What is CSS and what is it used for?

2. Write the correct names on the empty lines.

**property, declaration, value, selector**

3. How many selectors do we have and what are their names?

4. Write the name for each selector

<pre>#para1 {   text-align: center;   color: red; }</pre>	<pre>p {   text-align: center;   color: red; }</pre>	<pre>.center {   text-align: center;   color: red; }</pre>
